1. Description

STB-LF5 series current sensors are based on close loop principle. The sensor can detect the current with DC, AC, pulse and irregular wave shape with current output.

Typical application

- Windmill inverters
- AC variable speed and servo motor drives
- Uninterruptible Power supplies(UPS)
- Power supplies for welding applications
- Test and measurement
- Battery supplied applications
- Switched Mode Power Supplies(SMPS)
- Static converts for DC motor drives
