1. Description

STB-CAS/RH series current sensors are based on close loop principle with TMR technology. The sensor can detect the current with DC, AC, pulse and irregular wave shape.

Typical application

- Variable frequency converter
- Direct-current dynamo
- Uninterruptible Power Supplies (UPS)
- Switched mode power supplies (SMPS)
- Solar inverters.

General parameters

| Parameter | Symbol | Unit | Value |
|---------------------|--------|------|-----------|
| Working temperature | T_A | °C | -40 ~ 105 |
| Storage temperature | T_stg | °C | -40 ~ 105 |
