1. Description

STB-LA/B series current sensors are based on close loop principle technology. The sensor can detect the current with DC, AC, pulse and irregular wave shape.

Typical application

- Solar inverter
- Direct-current dynamo
- Uninterruptible Power Supplies (UPS)
- Switched mode power supplies (SMPS)
- Variable frequency converter

General parameters

Parameter	Symbol	Unit	Value	Remark
Working environment temperature	T_A	°C	-40 ~ 90	
Sensor operating limit temperature	T_{SL}	°C	-40 ~ 85	
Limit temperature of primary conductor	T_{LP}	°C	105	STB-100LA/B
Mass	m	g	15	STB-100LA/B

Absolute parameters

Parameters	Symbol	Unit	Value
Supply voltage	$V_{CC_{max}}$	V	±18
Maximum primary current	$I_{PN_{max}}$	A	$5 * I_{PN}$
ESD rating (HBM)	U_ESD_HBM	kV	4

Remark: the unrecoverable damage may occur when the product works on the conditions over the absolute maximum ratings. Long-time working on the absolute maximum ratings may cause the degradation on performance and reliability.

Isolation parameters

Parameter	Symbol	Unit	Value	Remark
RMS voltage for AC test 50Hz/1 min	U_d	kV	1.8	
Impulse withstand voltage 1.2/50μs	U_w	kV	8	
Clearance distance (pri. -sec)	dCI	mm	12	Shortest distance through air
Creepage distance (pri. -sec)	dCp	mm	12	Shortest path along device body
