

Sinomags Product Datasheet

# CURRENT SENSOR

Product series: STK-CTS/CB

Product part number: STK-32CTS/CB

Version: V1.0

Sinomags Technology Co., Ltd.

## 1. Description

STK-CTS/CB series products are built with two sets of independent current detection functions, the first is the conventional current detection function, the second is the arc current detection function.

## 2. Conventional current detection function

### 2.1 General Parameter

| Parameter   | Symbol | Unit | Value   |
|---|--------|------|---------|
| Working temperature                               | T_A    | °C   | -40~105 |
| Storage temperature                               | T_stg  | °C   | -40~105 |
| Mass  | m      | g    | 12      |
| Remark1: The product will not be damaged at 105°C |        |      |         |

### 2.2 Absolute Parameter

| Parameter   | Symbol | Unit | Value |
|---|--------|------|-------|
| Supply voltage  | Vc     | V    | 5     |
| ESD rating (HBM)  | Uesd   | KV   | 4     |
| Remark2: the unrecoverable damage may occur when the product works on the conditions over the absolute maximum ratings. Long-time working on the absolute maximum ratings may cause the degradation on performance and reliability. |        |      |       |

### 2.3 Isolation parameters

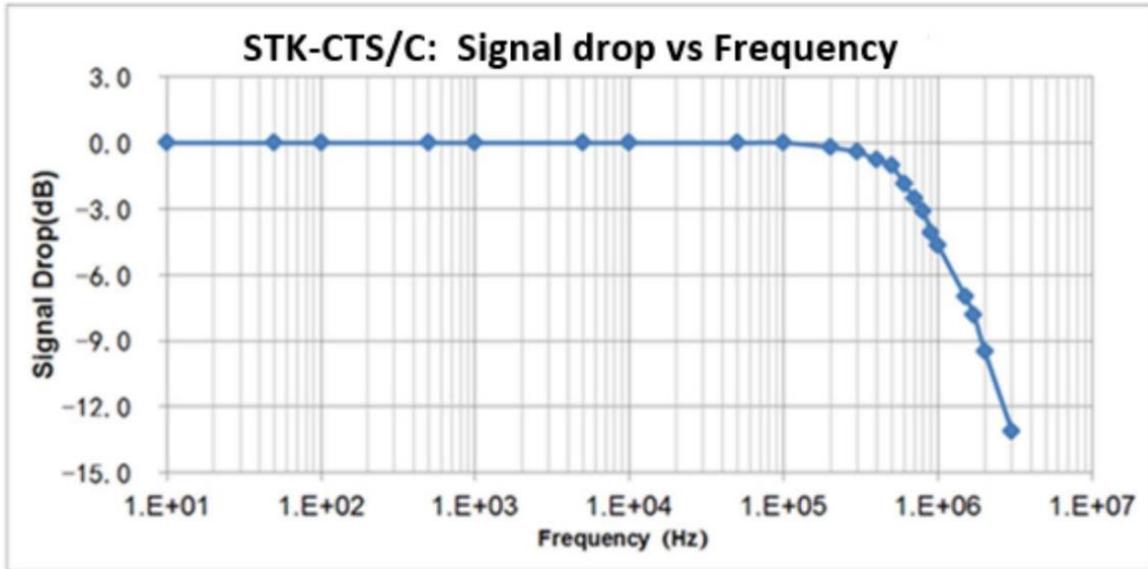

| Parameter                      | Symbol | Unit | Value                 | Remark                              |
|--------------------------------|--------|------|-----------------------|-------------------------------------|
| Isolation voltage, 50Hz, 1 min | Ud     | kV   | 4                     |                                     |
| Impact voltage 1.2/ 50s        | Üw     | kV   | 6                     |                                     |
| Clearance                      | dCI    | mm   | > 8                   | Shortest distance through air       |
| Creepage distance              | dCp    | mm   | > 8                   | Shortest distance along device body |
| Case material                  |        |      | V0 according to UL 94 |                                     |

## 2.4 STK-32CTS/CB Parameters

Condition: Vcc = 5.0 V, T\_A = 25°C, unless specified

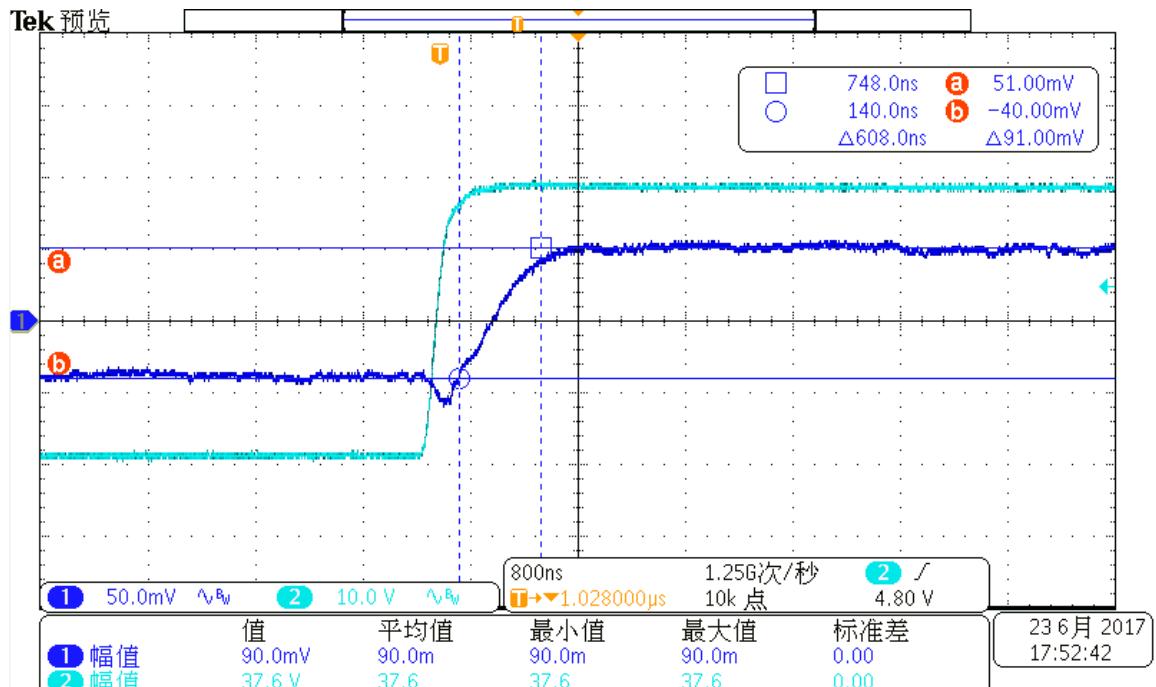

| Parameters               | Symbol   | Unit      | Min. | Typ.     | Max. | Remark                  |
|--------------------------|----------|-----------|------|----------|------|-------------------------|
| Maximum current          | I_pn     | A         | -32  |          | 32   |                         |
| Supply voltage           | Vcc      | V         | 4.75 | 5        | 5.25 |                         |
| Consumption current      | I_cc     | mA        |      | 5        | 10   |                         |
| Full-scale output        | V_FS     | V         |      | ±2       |      | (Vout @ ±I_pm) - Voff   |
| Output resistance        | R_out    | Ω         |      | 1        |      | @Vout                   |
| Offset voltage           | Voff     | V         | 2.48 | 2.5      | 2.52 | Vout @ 0 A              |
| Theoretical gain         | G_th     | mV/A      |      | 62.5     |      | 2 V @ I_pm              |
| Non-linearity            | Non-L    | % I_pm    |      | 0.5      |      | ± I_pm                  |
| reaction time            | t_ra     | μs        |      | 0.5      |      | @10% of I_pm            |
| Step response time       | t_res    | μs        |      | 1        |      | @90% of I_pm            |
| Delay time               | t_delay  | μs        |      | 1        |      | @400 kHz                |
| -3dB band width          | BW       | kHz       |      | 400      |      | Back-end non-RC circuit |
| Noise                    | Vnoise   | mVpp      |      | 15<br>25 |      | @ 25°C                  |
| DC ~ 10 kHz              |          |           |      |          |      |                         |
| DC ~ 100 kHz             |          |           |      |          |      |                         |
| Accuracy @ RT            | X        | % of I_pn | -1   |          | 1    | @ 25°C                  |
| Accuracy @ -40°C ~ 105°C | X_TRange | % of I_pn | -3   |          | 3    |                         |

## 2.5 Frequency band width

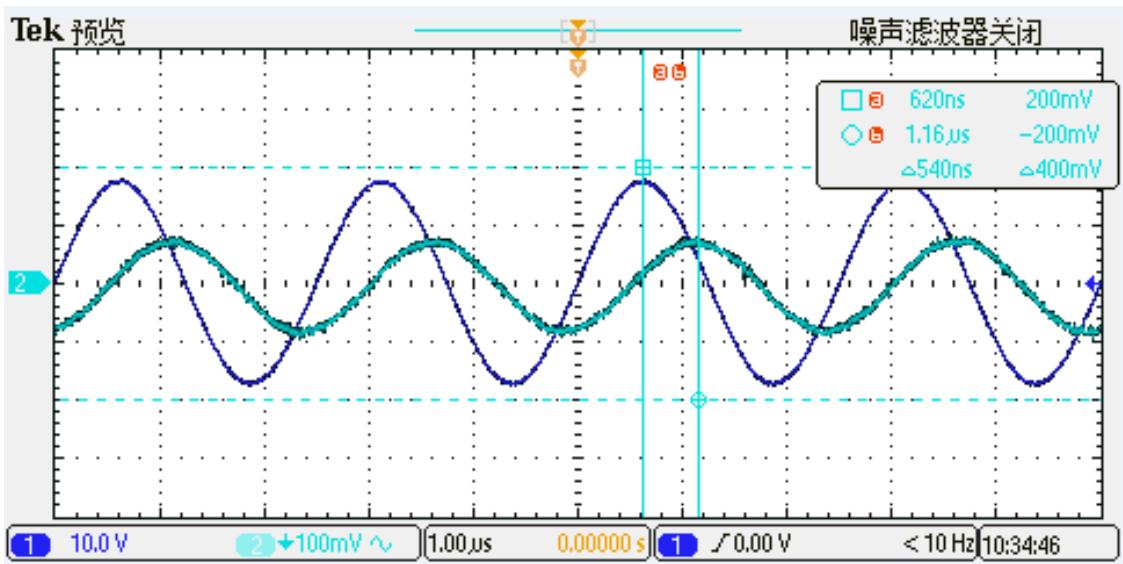

Remark: STK-CTS /CB series current sensor bandwidth. The bandwidth of the sensor is in the range of DC ~ 400 KHZ (- 3db).

## 2.6 Step response time

Remark: Step response time of STK-CTS/CB current sensor. The delay from 90% of the original current signal to 90% of the sensor output is less than 1 us. .

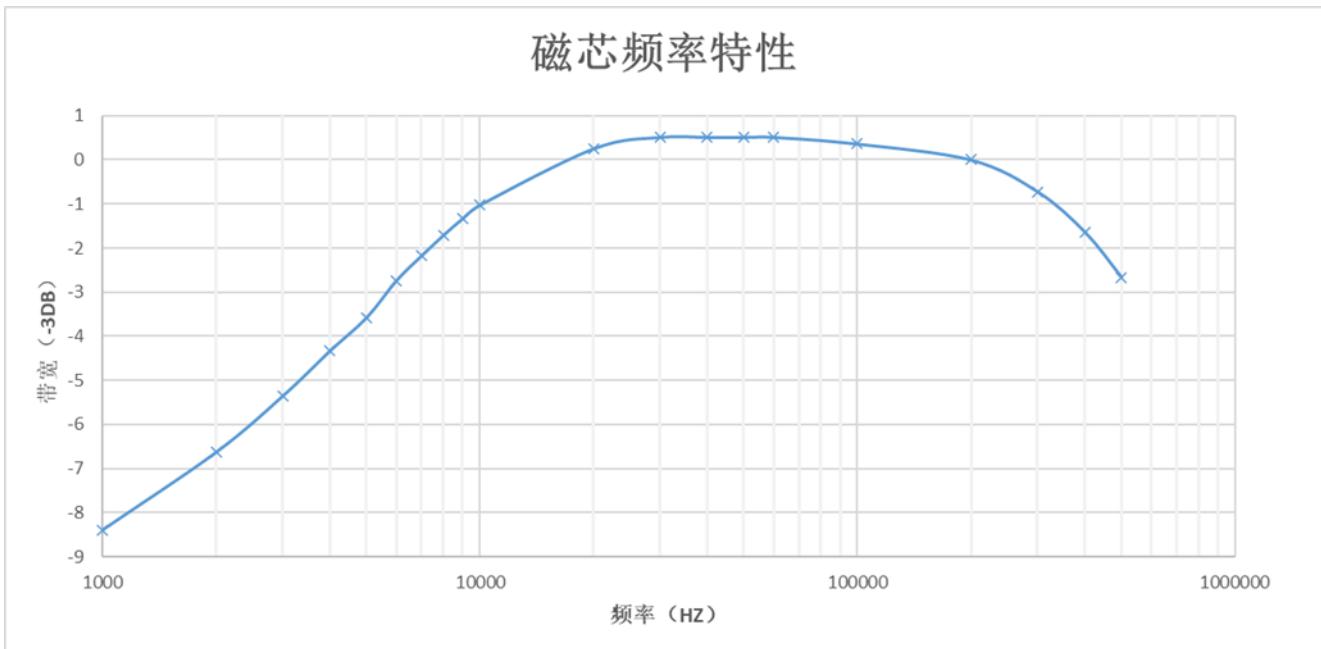

## 2.7 Frequency delay performance

Remark: Primary current was detected at a frequency of 400 kHz. Typical results of stK-CTS /CB current sensor output main current delay characteristics .

## 3. Arccurrent detection function

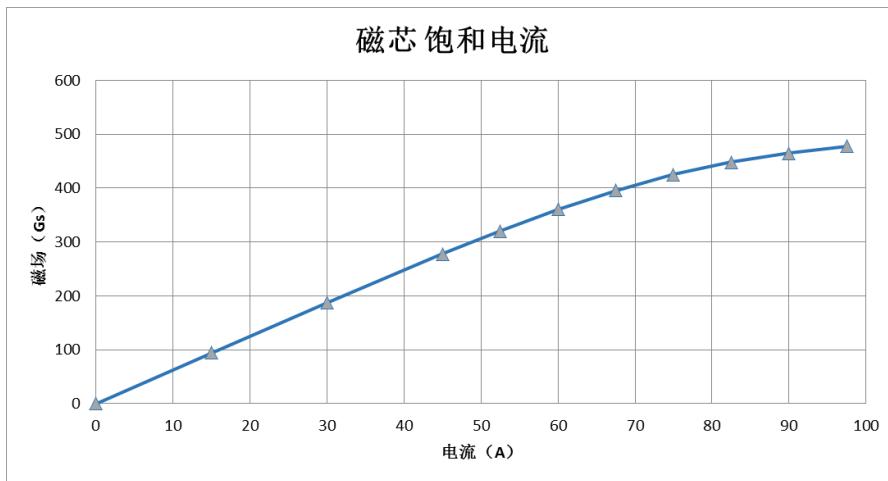

### 3.1 Frequency characteristics

Test conditions: the current at the primary side is 10 mA, the sampling resistance is 100 ohm, and the amplification is 150 times. The output at both ends of the test resistance varies with the current frequency at the primary side. The cut-off frequency is calculated according to the volt frequency

characteristics.

### 3.2 Saturation current

Test conditions: Gauss meter is used to test the open-gap magnetic field of the core varying with current.

### 3.3 Sensor specifications

| Parameter                                     | Measure | Min  | Typ  | Max  | Unit |
|---|---------|------|------|------|------|
| inductance                                    | L (5-6) | 3    | 3. 6 | 4. 2 | mH   |
| Q   | Q (5-6) | /    | /    | /    | /    |
| resistance                                    | R (5-6) | 4. 7 | 5. 2 | 5. 7 | Ω    |
| Turns ratio test                              | N (5-6) | /    | 200  | /    | TS   |
| Insulation voltage<br>50Hz, 1 min             | (5-6)   | /    | 4    | /    | KV   |
| High frequency<br>cut-off frequency<br>(-3db) | fH      | 400  | /    | /    | kHz  |
| Low frequency<br>cut-off frequency<br>(-3db)  | fL      | /    | /    | 8    | kHz  |
| Saturation current                            | Bs      |      | 50   |      | A    |
| The clearance                                 | 初级对次级   | /    | /    | /    | /    |
| Creepage distance                             | 初级对次级   | /    | >8   | /    | mm   |
| Wire level                                    |         |      | F 级  |      |      |

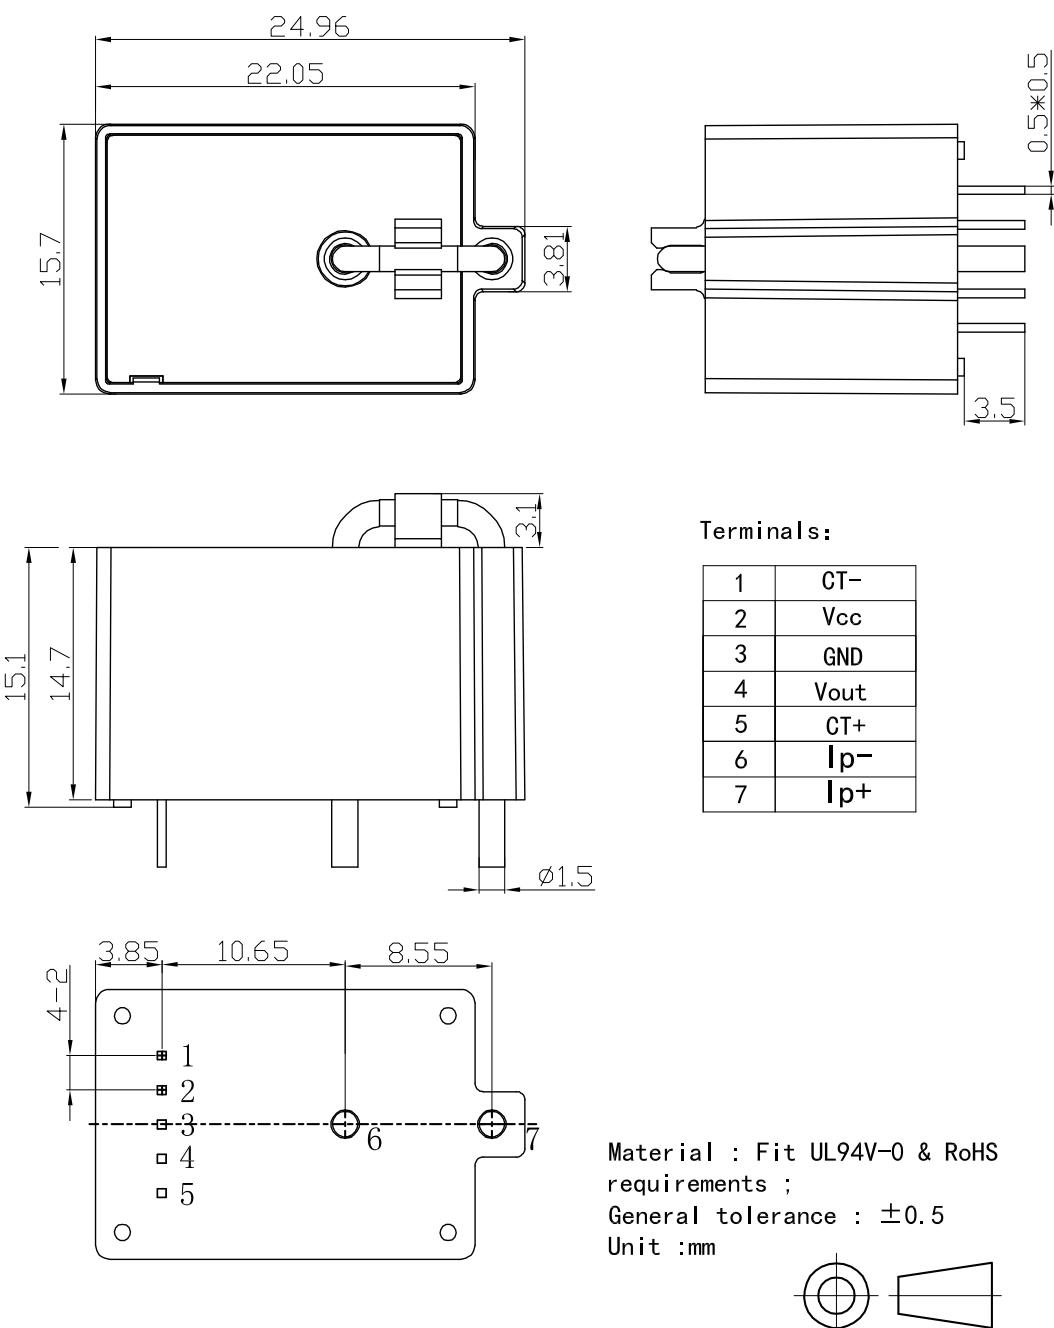

Test conditions: 1. Inductance test frequency 1K HZ, voltage 1 V.

2. Subtract the internal resistance of the multimeter for resistance test. .

3.Low frequency cut-off frequency sampling resistor: 100 Ω

4.The sampling resistance threshold of the amplification circuit should be < 300Ω (magnification 50x)

#### 4. Size

## 5. Welding features

### 5.1 Wave soldering method
